La mission di FMG è produrre materiali che rappresentino il massimo della bellezza, garantendo una disponibilità e una qualità che la pietra in natura non potrebbe offrire.

Block A e Block B sono due lastre che permettono di riprodurre l'effetto del marmo "a macchia aperta" con venatura speculare. È un effetto che in natura è decisamente raro e prezioso, perché richiede una speciale lavorazione, partendo da particolari blocchi selezionati. Questi prototipi di bellezza "ideale", finora riservati a edifici di lusso, sono oggi disponibili con continuità grazie all'avanguardia tecnologica MAXFINE.

IMPIEGO

Le lastre Block A-Block B possono essere posate a coppie, orientandole come in foto o capovolte. Sono utilizzabili anche con composizioni multiple, replicando il modulo più volte.

FMG's mission is to produce materials that are the tops in beauty, guaranteeing availability and quality such that stone, in nature, would be unable to offer.

Block A and Block B are two tiles that enable the effect of "book-matched" marble with mirror-image veining. This effect is definitely rare in nature and precious as it requires special processing, starting out from particular selected blocks.

These prototypes of "ideal" beauty, set aside so far for luxury buildings, are now available on a continuous basis thanks to MAXFINE avant-garde technology.

USE

Block A and Block B tiles can be laid in pairs, positioning them as shown in the photograph or turned upside down. They can also be used with multiple compositions, replicating the module more than once.

La mission de FMG est de produire des matériaux d'une beauté maximale tout en garantissant une disponibilité et une qualité que la pierre naturelle ne pourrait pas offrir.

Les deux carrelages grands formats Block A et Block B permettent de reproduire l'effet du marbre au veinage spéculaire dit « à livre ouvert ». Un effet particulièrement rare et précieux dans la nature étant donné qu'il exige une fabrication spéciale à partir de blocs sélectionnés.

Ces prototypes d'une beauté « idéale », réservés jusqu'à maintenant aux édifices de luxe, sont aujourd'hui disponibles en permanence grâce à l'avant-garde technologique MAXFINE.

UTILISATION

Les carrelages grands formats Block A-Block B peuvent être posés deux à deux soit en les orientant comme sur la photo soit en les retournant. En répliquant le module plusieurs fois, ils peuvent aussi être utilisés dans des compositions multiples.

Die Mission von FMG ist es Materialien herzustellen, die ein Maximum an Schönheit mit der Verfügbarkeit und einer Qualität kombinieren, die der Naturstein niemals bieten kann.

Block A und Block B sind zwei Platten, mit denen man den Effekt des Marmors "a macchia aperta" („offenes Buch“) mit spiegelgleicher Maserung reproduzieren kann. Es handelt sich um einen Effekt, der in der Natur sehr selten und wertvoll ist, denn hier bedarf es einer speziellen Verarbeitung, bei der von besonderen und ausgewählten Blöcken ausgegangen wird.

Diese Prototypen der "idealen" Schönheit, die bisher den Luxusbauten vorbehalten war, gibt es heute – dank des technologischen Fortschritts von MAXFINE - kontinuierlich.

VERWENDUNG

Die Platten Block A-Block B können paarweise verlegt werden, indem sie wie im Bild ausgerichtet werden oder aber auch auf dem Kopf. Sie lassen sich auch bei Mehrfachkompositionen im Quadrat oder in der Reihe benutzen, wobei das Modul mehrere Male wiederholt wird.
