A new bathroom experience

Tutto in questo mondo, vive in simbiosi, anche le cose più distanti possono convivere tra loro, influenzarsi e coesistere.

Questo rapporto viene espresso perfettamente dal concetto di percentuale.

71% è la percentuale di superficie terrestre coperta da acqua, scambio e simbiosi alla base di tutto.

L'equilibrio perfetto.

Con questa premessa Iris Ceramica Group ha creato Seventyonepercent, una visione contemporanea dell'arredo bagno che unisce la sensibilità verso l'ambiente alla ricerca costante sul design e la selezione dei materiali.

Un concetto di arredo bagno, emozionante, contemporaneo e sostenibile.

Everything in this world lives in symbiosis, even the most distant things can coexist and influence each other.

This relationship is perfectly expressed by the concept of the percentage.

71% is the percentage of the earth covered by water, the exchange and symbiosis at the base of everything.

The perfect balance.

Based on this idea, Iris Ceramica Group has created Seventyonepercent, a contemporary vision of bathroom furnishings that combines sensitivity to the environment with the constant study of design and the selection of materials.

An exciting, contemporary and sustainable bathroom furnishing concept.

Alles in dieser Welt lebt in Symbiose. Selbst die entferntesten Elemente können sich gegenseitig beeinflussen und nebeneinander bestehen.

Diese Beziehung wird perfekt durch das Konzept des Prozentsatzes zum Ausdruck gebracht.

71 % ist der prozentuale Anteil der von Wasser bedeckten Fläche der Erde.

Ort des Austauschs und der Symbiose, die allem zugrunde liegt.

Das perfekte Gleichgewicht.

Dies vorausgeschickt, hat Iris

Ceramica Group Seventyonepercent geschaffen, eine zeitgemäße Vision der Badezimmereinrichtung, die eine große Sensibilität gegenüber der Umwelt mit kontinuierlichen Designstudien und einer sorgfältigen Materialauswahl verbindet.

Ein Badezimmerkonzept, das Emotionen weckt. Modern und nachhaltig.

Tout dans ce monde vit en symbiose, même les choses les plus éloignées peuvent vivre ensemble, s'influencer mutuellement et coexister. Cette relation est parfaitement exprimée par le concept de pourcentage.

71%, c'est le pourcentage de la surface de la terre couverte par l'eau, l'échange et la symbiose à la base de tout. L'équilibre parfait.

Partant de ce principe, Iris Ceramica Group a créé Seventyonepercent, une vision contemporaine de la décoration des salles de bains qui associe la sensibilité à l'environnement: une recherche constante sur la conception et le choix des matières.

Un concept passionnant, contemporain et durable de décoration de salles de bains.

One group, countless success stories

SINERGIA, UNIONE, COLLABORAZIONE.

La presenza di brand con connotazioni e target diversi come quelli che compongono Iris Ceramica Group non è solo frutto di una scelta strategica a livello manageriale e organizzativo; è un modo di pensare l'azienda, un'offerta completa e integrata che arricchisce il settore. Nel pieno rispetto delle peculiarità e dell'identità di ogni azienda, far parte della nostra grande famiglia significa per ciascuno di noi crescere insieme, avere maggiori opportunità, offrire un servizio globale al consumatore all'insegna della qualità e della completezza di gamma. Essere un Gruppo significa avere un approccio condiviso al mercato, mettere a frutto tecnologie, asset strategici e metodologie produttive, condividere iniziative e risorse per non essere più solo un insieme di aziende manifatturiere, ma divenire una risposta efficace e vantaggiosa per i nostri clienti.

SYNERGY, UNITY, COOPERATION.

The presence of brands with different connotations and target markets, like the ones that make up the Iris Ceramica Group, is more than just the result of strategic decision-making at a managerial and organizational level; it's the philosophy that underpins our company, and our way of offering a comprehensive, integrated range that enriches the industry. For all of us, membership of this great family, in full respect of the individual character and identity of each company, means growing together, reaping more opportunities and offering a global service to consumers, built on top quality and a comprehensive range. Working as a Group means taking a shared approach to the market, harnessing technologies, strategic assets and production methods to best effect and pooling resources and initiatives. In this way we're no longer just a collection of manufacturing companies, but an effective, unrivalled resource for our customers.

SYNERGIE, UNION ET COLLABORATION.

La présence au sein d'Iris Ceramica Group de marques aux caractéristiques et aux visées distinctes n'est pas seulement le fruit d'un choix stratégique en termes de gestion et d'organisation, c'est aussi une façon de penser l'entreprise comme un éventail d'offres complet et intégré à même d'enrichir le secteur. Faire partie de notre grande famille signifie respecter les particularités et la singularité de chaque société et permettre à chacune d'entre elles de grandir ensemble, de disposer d'un plus grand nombre d'opportunités et d'offrir aux consommateurs un service global alliant qualité et exhaustivité des gammes de produits. Être un groupe, c'est partager une même approche du marché, profiter des technologies, des atouts stratégiques et des méthodes de production de chacun, mettre en commun les initiatives et les ressources pour ne pas être seulement un ensemble d'entreprises manufacturières mais aussi apporter à nos clients des réponses pertinentes et avantageuses.

SYNERGIE, EINHEIT, ZUSAMMENARBEIT.

Die Präsenz von Marken mit so unterschiedlichen Konnotationen und Zielsetzungen wie die der Iris Ceramica Group ist nicht nur das Ergebnis einer strategischen Entscheidung auf Management- und Organisationsebene, sondern auch eine Denkweise des Unternehmens, ein vollständiges und integriertes Angebot, das den Sektor bereichert. Die Zugehörigkeit zu unserer großen Familie bedeutet, dass wir alle zusammenwachsen, mehr Möglichkeiten haben und dem Verbraucher einen globalen Service im Namen der Qualität und eines umfassenden Angebots bieten, wobei die Besonderheiten und die Identität jedes einzelnen Unternehmens voll und ganz respektiert werden. Eine Gruppe zu sein bedeutet, ein gemeinsames Konzept für den Markt zu haben, Technologien, strategische Assets und Produktionsmethoden zu nutzen, Initiativen und Ressourcen zu teilen, so dass wir nicht mehr nur eine Gruppe von Produktionsbetrieben sind, sondern eine effektive und vorteilhafte Antwort für unsere Kunden werden.

MUSEO STORICO

Il Museo Storico Iris Ceramica Group rappresenta la testimonianza concreta di una grande storia imprenditoriale, raccontandone i valori, le intuizioni, le tappe, i traguardi. È una struttura in divenire, che aggiungerà in futuro le nuove pietre miliari costruite con il lavoro di oggi.

The Iris Ceramica Group's Museum of History offers concrete testimony of a long history in enterprise, telling the story of the Group's values, intuitions, progress and achievements. It is an ever-changing facility where new milestones will be added in the future, constructed through the work being done today.

Le Musée Historique d'Iris Ceramica Group est le témoignage concret de la riche histoire de l'entreprise : il raconte ses valeurs, ses intuitions, les étapes de son parcours et ses grands succès. Cette structure en devenir sera complétée par les nouveaux jalons que nos efforts actuels permettront d'atteindre à l'avenir.

Das Historische Museum von Iris Ceramica Group ist ein konkretes Zeugnis einer großen Unternehmensgeschichte, das von den Werten, Erkenntnissen, Etappen und Zielen des Unternehmens erzählt. Es ist eine im Werden begriffene Struktur, die in der Zukunft neue Meilensteine hinzufügen wird, die mit der Arbeit von heute gebaut werden.

Zero Emissions

The world's first green hydrogen ceramic industry is born

Iris Ceramica Group e Snam hanno sottoscritto un protocollo d'intesa per un progetto industriale che prevede lo studio e lo sviluppo della **prima fabbrica ceramica al mondo alimentata ad idrogeno verde**. Il nuovo stabilimento di Iris Ceramica Group che verrà realizzato a Castellarano (RE), sarà dotato entro il 2022 di tecnologie native che consentiranno di utilizzare l'idrogeno verde..

Zero Emission è un obiettivo ambizioso che Iris Ceramica Group si è dato nell'ottica di conciliare attività produttiva e benessere dei cittadini che vivono vicino agli stabilimenti produttivi di lastre decorate. Con ingenti investimenti sono stati installati impianti a "combustore con recupero termico rigenerativo" che assicurano altissime efficienze, abbattendo i residui di molecole organiche volatili presenti nei fumi, odori compresi e raggiungendo di fatto l'obiettivo di emissioni volatili zero. Limite di legge per i COV: 50 mg/Nm³. Valori registrati inferiori a 2 mg/Nm³. Questo traguardo è solo una parte dell'azione decisa e continua **per ridurre l'impronta ambientale del Gruppo** limitando i consumi energetici, il consumo di acqua, la riduzione e recupero di scarti e rifiuti.

The Iris Ceramica Group and Snam have signed a memorandum of understanding for an industrial project involving the study and development of the **world's first ceramics factory powered by green hydrogen**. The new Iris Ceramica Group production site, which will be completed in Castellarano (RE), will, by 2022, be equipped with native technologies allowing the use of green hydrogen as an energy source.

Zero emissions is an ambitious goal the Iris Ceramica Group has set itself to reconcile its production with the wellbeing of people living in the vicinity of its ceramic plants. Major investment has permitted installation of systems including a "regenerative thermal oxidizer" ensuring ultra-high efficiency, cutting residues of volatile organic molecules present in fumes, including odours, and effectively achieving the target of zero volatile emissions. Legal limit on VOCs: 50 mg/Nm³. Values recorded under 2 mg/Nm³. This goal is only a one step in an ongoing process aimed at **reducing the Group's environmental footprint** by limiting consumption of energy and water and reducing and reusing waste and scrap.

Iris Ceramica Group et Snam ont conclu un protocole d'accord concernant un projet industriel prévoyant l'étude et le développement de la **première usine de céramique au monde alimentée à l'hydrogène vert**. Réalisé à Castellarano (Reggio d'Émilie), le nouvel établissement d'Iris Ceramica Group sera doté d'ici 2022 de technologies natives permettant l'utilisation d'hydrogène vert.

« **Émission zéro** » : tel est l'objectif ambitieux qu'Iris Ceramica Group s'est fixé dans la perspective de concilier sa production et le bien-être des riverains des établissements fabriquant ses dalles ornementales. D'énormes investissements ont permis d'installer des installations dotées de « brûleurs permettant une oxydation thermique régénérative » assurant de très hautes performances, réduisant les résidus des molécules organiques volatiles présentes dans les fumées (y compris des odeurs) et d'atteindre concrètement l'objectif d'une émission zéro de composés volatils. Limite légale pour les COV : 50 mg/Nm³. Valeurs enregistrées inférieures à 2 mg/Nm³. Ce résultat n'est qu'une facette de nos actions résolues et constantes pour **réduire l'empreinte écologique du groupe** non seulement en limitant les consommations d'eau et d'énergie mais aussi en diminuant et en récupérant les rebuts et les déchets.

Iris Ceramica Group und Snam haben eine Absichtserklärung für ein Industrieprojekt unterzeichnet, das die Erforschung und Entwicklung **der weltweit ersten mit grünem Wasserstoff betriebenen Keramikfabrik vorsieht**. Das neue Werk von Iris Ceramica Group, das in Castellarano (RE) gebaut wird, wird bis 2022 mit den entsprechenden Technologien ausgestattet sein, die die Verwendung von grünem Wasserstoff ermöglichen werden.

Zero Emission ist ein ehrgeiziges Ziel, das sich Iris Ceramica Group gesetzt hat, um die Produktionstätigkeit mit dem Wohlbefinden der Menschen in Einklang zu bringen, die in der Nähe ihrer Produktionsstätten für dekorierte Platten leben. Es wurden erhebliche Investitionen getätigt, um "Verbrennungsanlagen mit regenerativer Wärmerückgewinnung" zu installieren, die einen extrem hohen Wirkungsgrad gewährleisten, die Rückstände flüchtiger organischer Moleküle in den Abgasen, einschließlich der Gerüche, reduzieren und das Ziel von null flüchtigen Emissionen erreichen. Gesetzlicher Grenzwert für VOCs: 50 mg/Nm³. Aufgezeichnete Werte von weniger als 2 mg/Nm³. Dieses Ziel ist nur ein Teil der entschlossenen und kontinuierlichen Maßnahmen zur **Verringerung des ökologischen Fußabdrucks des Konzerns** durch die Begrenzung des Energie- und Wasserverbrauchs sowie die Reduzierung und Verwertung von Ausschuss und Abfällen

SURFACES
ACTIVE[®]
design for a better life

Where design and science meet beauty and well-being live

L'esclusiva finitura eco-attiva ACTIVE SURFACES® con azione **antibatterica, antivirale ed anti-inquinamento**.

ACTIVE SURFACES® è l'unica ceramica eco-attiva certificata ISO e brevettata a livello internazionale, presente con successo da oltre 10 anni in tutto il mondo.

Efficace contro i virus SARS-CoV-2.

Uno studio del Dipartimento di Scienze Biomediche, Chirurgiche e Odontoiatriche e del Dipartimento di Scienze Biomediche per la Salute dell'**Università degli studi di Milano** ha evidenziato la capacità di ACTIVE SURFACES® di **eliminare il SARS-CoV-2 al 94% in seguito a sole 4 ore di esposizione a luce UV a bassa intensità** (luce naturale e lampadine tradizionali anche a bassa intensità).

The exclusive eco-active ACTIVE SURFACES® finish with **antibacterial, antiviral and anti-pollutant action**.

ACTIVE SURFACES® is the world's only internationally patented and ISO certified eco-active ceramic, successfully installed for over a decade all over the world.

Effective against the SARS-CoV-2 viruses.

A study conducted by the Department of Biomedical, Surgical and Dental Sciences and the Department of Biomedical Health Sciences of **Milan University** has revealed that ACTIVE SURFACES® are capable of **eliminating 94% of SARS-CoV-2 viruses after only 4 hours of exposure to low intensity UV light** (natural light or a conventional lightbulb, even at low intensity).

Peut être doté de notre finition éco-active exclusive ACTIVE SURFACES® : un revêtement **antibactérien, antiviral et anti-pollution**.

Utilisée avec succès dans le monde entier depuis plus de 10 ans, ACTIVE SURFACES® est la seule céramique éco-active certifiée ISO et brevetée à l'international.

Efficace contre les virus SARS-CoV-2.

Une étude du département des sciences biomédicales, chirurgicales et dentaires et du département des sciences biomédicales pour la santé de l'**université de Milan** a montré qu'ACTIVE SURFACES® était en mesure d'**éliminer le SARS-CoV-2 à 94 % après seulement 4 heures d'exposition à une lumière UV de faible intensité** (lumière naturelle et ampoules traditionnelles même à faible intensité).

In der exklusiven öko-aktiven Ausführung ACTIVE SURFACES® hergestellt, mit **Bakterien, Viren und Schmutz abstoßender Wirkung**.

ACTIVE SURFACES® ist die einzige öko-aktive Keramik mit ISO-Zertifikat und internationalem Patent, die seit über 10 Jahren erfolgreich weltweit vertrieben wird.

Wirksam gegen SARS-CoV-2-Viren.

Eine Studie der Abteilung für biomedizinische, chirurgische und zahnmedizinische Wissenschaften und der Abteilung für biomedizinische Wissenschaften für Gesundheit an der **Universität Mailand** hat gezeigt, dass ACTIVE SURFACES® in der Lage sind, **SARS-CoV-2 nach nur vierstündiger Einwirkung von UV-Licht mit niedriger Intensität** (natürliches Licht und herkömmliche Glühbirnen ebenfalls mit niedriger Intensität) um 94 % zu eliminieren.

HYPERTOUCH

EMOTIONAL SURFACES

OFF

Sfiorando o esercitando una lieve pressione sulla superficie Hypertouch, la luce si spegne.

The lights switch off slightly touching or pressing the Hypertouch surfaces.

La lumière s'éteint dès que l'on effleure ou que l'on appuie légèrement sur la surface Hypertouch.

Die Hypertouch-Oberfläche berühren oder leicht darauf drücken, um das Licht auszuschalten.

ON

Sfiorando o esercitando una lieve pressione sulla superficie Hypertouch, la luce si accende.

The lights switch on slightly touching or pressing the Hypertouch surfaces.

La lumière s'allume dès que l'on effleure ou que l'on appuie légèrement sur la surface Hypertouch.

Die Hypertouch-Oberfläche berühren oder leicht darauf drücken, um das Licht einzuschalten.

Light up the emotions

Iris Ceramica Group presenta **Hypertouch**, l'innovativa tecnologia capacitiva a scomparsa applicata alle superfici ceramiche che potenzia le funzionalità del design oltre l'immaginazione.

Sfiorando leggermente la superficie **Hypertouch**, si attiva un **sistema integrato di sensori domotici** per l'accensione e lo spegnimento di impianti di illuminazione, audio-video, serramenti, controllo della temperatura. **Hypertouch** esalta il design e la continuità dei materiali, eliminando placche e interruttori esterni antiestetici.

È così che la superficie ceramica accende l'atmosfera e dà vita all'ambiente.

Hypertouch sfrutta una tecnologia esclusiva, ideata e brevettata¹ da **Iris Ceramica Group**, applicabile alle lastre ceramiche distribuite dai Brand del Gruppo.

Design, libertà creativa e semplicità di utilizzo definiscono le superfici **Hypertouch** ideate per interpretare un nuovo modo di progettare gli spazi interni, in linea con le esigenze contemporanee di chi li vive.

Si può scegliere **Hypertouch** anche con le proprietà **Active Surfaces®**: i materiali ecoattivi in grado di degradare agenti microbici (batteri, virus, funghi e muffe), inquinanti e particelle odorogene².

Iris Ceramica Group presents **Hypertouch**, the innovative, concealed capacitive technology applied to ceramic surfaces that enhances design functions beyond imagination.

By lightly touching the **Hypertouch** ceramic surface an **integrated system of home-automation sensors** are activated to switch on and off lighting and audio-video devices, control doors and windows and set the room temperature. **Hypertouch** enhances the design and continuity of surfaces, eliminating unsightly cover plates and external switches.

In this way ceramic surfaces can change the atmosphere and bring the environment to life.

Hypertouch uses an exclusive technology designed and patented¹ by **Iris Ceramica Group**, applicable to the ceramic slabs distributed by the various Brands of the Group.

Hypertouch surfaces are characterized by design, creative freedom and simplicity of use, interpreting a new way of designing interior spaces in line with contemporary living needs.

Hypertouch is also available with the **Active Surfaces®** properties: eco-active materials able to defeat microbial agents (viruses, bacteria, fungi, mould), pollution and odour particles².

Iris Ceramica Group présente **Hypertouch**, une technologie capacitiv innovante et invisible pensée pour les surfaces céramiques qui élargit l'horizon de l'aménagement d'intérieur au-delà de l'imagination.

Effleurant légèrement la surface d'**Hypertouch** permet d'activer un système intégré de capteurs domotiques commandant l'allumage ou l'extinction de l'éclairage, du système audio-vidéo, des fenêtres et de la régulation thermique. **Hypertouch** sublime le design et la continuité des matières en éliminant les plaques et les interrupteurs externes disgracieux.

La surface céramique anime l'atmosphère et donne vie à l'espace.

Hypertouch se base sur une technologie exclusive conçue et brevetée¹ par **Iris Ceramica Group** pour les dalles en céramique distribuées par les marques du groupe.

Design, liberté de création et simplicité d'utilisation : tels sont les maîtres-mots des surfaces **Hypertouch** pensées pour révolutionner la façon de concevoir les espaces intérieurs en parfaite adéquation avec les besoins de l'habitat contemporain.

Hypertouch est également disponible en version **AActive Surfaces®** : des matériaux éco-actifs en mesure de dégrader les agents microbiens (bactéries, virus, champignons et moisissures), les polluants et les particules odorantes².

Iris Ceramica Group präsentiert **Hypertouch**, die innovative, einziehbare kapazitive Technologie, die auf keramische Oberflächen angewendet wird und die Funktionalität des Designs unvorstellbar verbessert.

Durch leichtes Berühren der Oberfläche **Hypertouch** wird ein integriertes Sensorsystem für die Hausautomation aktiviert, um das Ein- und Ausschalten der Beleuchtung, von Audio- und Videoanlagen und Rollläden sowie die Temperaturregelung zu steuern. **Hypertouch** betont das Design und die Kontinuität der Materialien, indem unschöne, extern angebrachte Schilder und Schalter wegfallen.

Dadurch belebt die Keramikfläche die Atmosphäre und lässt die Umgebung wirken.

Hypertouch benutzt eine exklusive, von **Iris Ceramica Group** entwickelte und patentierte¹ Technologie, die auf die von den Marken der Gruppe vertriebenen Keramikplatten anwendbar ist.

Design, kreative Freiheit und Benutzerfreundlichkeit sind die Merkmale aller **Hypertouch**-Oberflächen, die eine neue Art der Innenarchitektur möglich machen, im Einklang mit den modernen Bedürfnissen der Menschen, die in den Räumen leben sollen.

Hypertouch gibt es auch mit den Eigenschaften **Active Surfaces®**: Ökologisch aktive Materialien, die in der Lage sind, mikrobielle Stoffe (Bakterien, Viren, Pilze und Schimmelpilze), Schadstoffe und geruchsverursachende Partikel abzubauen².

DESIGN YOUR SLABS

404 · 405

Design your slabs. Think digital. Be yourself

SFRUTTA TUTTO IL POTENZIALE DI TECNOLOGIE DIGITALI DI ULTIMISSIMA GENERAZIONE.

Con **Design Your Slabs** puoi dare piena realizzazione alla tua personalità, dando forma a molteplici e originali idee di decorazione sulle più svariate tipologie di superfici e formati: dalle lastre di grandi dimensioni, per ottenere un'accattivante continuità visiva, alle varianti più piccole, ideali per dar vita ad affascinanti composizioni estetiche.

Colori, nuance, ispirazioni naturali e artistiche, texture: con **Design Your Slabs** l'immaginazione non ha più limiti e tutte le idee possono prendere forma, fin nei minimi dettagli, su superfici ceramiche pensate per essere uniche. Come te.

Con **Design Your Slabs** puoi realizzare tue idee creative ovunque, con la garanzia di ottenere sempre i massimi risultati dal punto di vista estetico e tecnico.

TAKE ADVANTAGE OF THE LATEST GENERATION DIGITAL TECHNOLOGY POTENTIAL.

With **Design Your Slabs** you can fully realise your personality, giving shape to multiple and original ideas of decoration on a wide variety of surfaces and formats: from large slabs, to obtain eye-catching visual continuity, to smaller variants, ideal for creating beautiful aesthetic compositions.

Colours, nuances, natural and artistic inspirations, textures: with **Design Your Slabs**, imagination has no limits and all ideas can take shape, down to the smallest detail, on ceramic surfaces designed to be unique. Like you.

With **Design Your Slabs** you can implement your creative ideas anywhere, with the guarantee of obtaining the maximum results from an aesthetic and technical perspective.

PROFITEZ PLEINEMENT DU POTENTIEL DES TECNOLOGIES NUMÉRIQUES DE TOUTE DERNIÈRE GÉNÉRATION.

Avec **Design Your Slabs**, vous pouvez donner libre cours à vos envies personnelles en donnant forme à des idées de décoration multiples et originales sur les types de surfaces et de formats les plus variés : des dalles de grandes dimensions - pour obtenir une superbe continuité visuelle - aux versions plus petites, idéales pour donner naissance à de fascinantes compositions esthétiques.

Couleurs, nuances, textures, inspirations naturelles et artistiques : avec **Design Your Slabs**, l'imagination n'a plus de limites et toutes les idées peuvent se concrétiser jusque dans les moindres détails sur des surfaces en céramique conçues pour être uniques. Tout comme vous.

Avec **Design Your Slabs**, vous pouvez donner vie à vos idées créatives n'importe où, avec la garantie de toujours obtenir les meilleurs résultats d'un point de vue esthétique et technique.

ES NUTZT DAS VOLLE POTENZIAL DER NEUESTEN GENERATION DIGITALER TECHNOLOGIEN.

Mit **Design Your Slabs** können Sie Ihre Persönlichkeit voll entfalten und vielen originellen Dekorationsideen auf den unterschiedlichsten Oberflächen und Formaten Gestalt geben: von großen Platten, um eine attraktive visuelle Kontinuität zu erreichen, bis hin zu den kleinsten Varianten, ideal für faszinierende ästhetische Kompositionen.

Farben, Nuancen, natürliche und künstlerische Inspirationen, Texturen: Mit **Design Your Slabs** sind der Fantasie keine Grenzen gesetzt und alle Ideen können bis ins kleinste Detail auf einzigartigen Keramikoberflächen entstehen. Einzigartig genau wie Sie.

Mit **Design Your Slabs** können Sie Ihre kreativen Ideen überall verwirklichen, mit der Garantie, immer die besten Ergebnisse aus ästhetischer und technischer Sicht zu erzielen.

INSTALLATION SUGGESTIONS

PAVIMENTO POSA TRADIZIONALE

La posa delle lastre **MAXFINE** richiede condizioni di posa simili a quelle richieste per lastre in formato tradizionale. **MAXFINE** richiede l'utilizzo della tecnica a doppia spalmatura, ovvero il collante deve essere applicato sia sul fondo di posa che sul retro della lastra.

Per la posa a pavimento, **MAXFINE** richiede le migliori condizioni di sottofondo:

- planarità;
- pulizia da polvere, detriti ed eliminazione di grumi di cemento;
- il fondo di posa deve essere omogeneo e avere già compiuto il ritiro igrometrico di maturazione;
- riparazione di eventuali fessurazioni;
- i dislivelli di planarità devono essere colmati con idonei prodotti di rasatura.

Strumentazione necessaria

- Collante in polvere a base cementizia a letto pieno di classe "C2E secondo le normative EN 12004 e S1 secondo la normativa EN 12002"
- spatola a denti quadri 3x3 mm e spatola a denti tondi 15 mm;
- telaio a ventosa per la movimentazione o biventosa
- battitore in plastica antirimbalo 170x370 mm;
- sistema livellante: base + cuneo + pinza.

Fasi di lavorazione

INCOLLAGGIO A PAVIMENTO

- 1) Assicurarsi che la superficie da rivestire sia consistente, planare, priva di polvere e unti/grassi.
- 2) Utilizzare i collanti sopra descritti miscelati in base alle specifiche indicate nella scheda tecnica del collante prescelto.
- 3) Stendere il collante sulla superficie da rivestire con spatola a denti tondi 15 mm per un'area superiore di 5/10 cm rispetto alle dimensioni della lastra.
- 4) Con la lastra in posizione verticale sul telaio di movimentazione, stendere il collante sul retro della lastra con spatola a denti quadri 3x3 mm.
- 5) Con l'utilizzo del telaio a ventosa portare la lastra in posizione orizzontale e posarla.
- 6) Per garantire l'incollaggio uniforme della lastra, si deve utilizzare apposito battitore in plastica anti-rimbalo 170x370 mm, effettuando una battitura dal centro verso i bordi per eliminare eventuali sacche d'aria fra il retro della lastra, il collante ed il fondo di posa.
- 7) Utilizzo di sistema livellante.

SISTEMA LIVELLANTE

Il sistema livellante è volto a garantire con semplicità e rapidità pavimenti perfettamente livellati eliminando i dislivelli ("denti") tra le lastre. Il sistema livellante è vivamente consigliato per la posa delle lastre **MAXFINE**.

Strumentazione necessaria

- Base;
- Cuneo;
- Pinza regolabile per installazione a pavimento / rivestimento.

Applicazione del sistema livellante

Posizionamento della base:

- a) Dopo avere steso il collante inserire la base al di sotto della lastra **MAXFINE** in corrispondenza dei 4 lati.
- b) In funzione del formato della lastra posizionare uno o più supporti per ogni lato della lastra.
- c) Posizionare la lastra.

Inserimento del cuneo:

- a) Inserire il cuneo nella feritoia del supporto facendo attenzione a non superare il punto di rottura.
- b) Per agevolare l'inserimento del cuneo si consiglia l'uso della pinza a trazione regolabile.

Eliminazione del supporto:

- a) A maturazione del collante avvenuta, la parte sporgente del supporto si separa dalla base battendo con il piede nella direzione della linea di fuga.

CONSIGLI GENERALI DI STUCCATURA

Fare attenzione nella scelta dei sigillanti per le fughe; controllare le schede tecniche, sceglierli possibilmente tono su tono e seguire scrupolosamente i tempi di pulizia consigliati in quanto diversi sigillanti colorati di nuova generazione, contengono pigmenti ed additivi che possono essere particolarmente tenaci.

Per le superfici levigate/lucidate non adoperare stucchi epossidici o malte flessibili a base di materiali sintetici (Flexfughe) e non aggiungere additivi/lattici allo stucco in quanto essi rendono estremamente difficoltosa l'eliminazione dei residui coi normali prodotti di pulizia. Qualora si decida comunque di utilizzarli, si raccomanda di eseguire sempre una prova preventiva fuori d'opera.

TRADITIONAL FLOOR LAYING

Laying **MAXFINE** slabs requires similar laying conditions to those required for traditional format slabs. **MAXFINE** requires the adhesive to be applied both on the setting bed and on the back of the slab.

MAXFINE slabs for flooring require the following conditions:

- A flat surface;
- Clean and free from dust, scraps and any lumps of cement;
- The setting bed must be uniform and have already undergone the drying shrinkage process;
- Repair of any cracks;
- Any uneven parts on the surface must be filled with suitable levelling compounds.

Instruments required

- Cement-based powder adhesive for full spread, class "C2E according to EN12004 and S1 according to EN12002 standards";
- 3x3 mm square toothed trowel and 15 mm round toothed trowel;
- Frame with suction cups for handling or double suction cups;
- Non-bounce plastic mallet 170x370 mm;
- Levelling system: base clip + wedge + pliers.

Processing stages

BONDING TO THE FLOOR

- 1) Ensure that the surface to be covered is solid, flat and free from dust and oil/grease.
- 2) Use the adhesives described above mixed according to the specifications indicated in the technical data sheet of the chosen adhesive.
- 3) Spread the adhesive onto the surface to be covered with a 15 mm round toothed trowel across an area of 5/10 cm more than the dimensions of the slab.
- 4) With the slab in a vertical position on the handling frame, spread the adhesive onto the back of the slab with a 3x3 mm square toothed trowel.
- 5) Using the frame with suction cups, bring the slab into a horizontal position and lay it.
- 6) To guarantee uniform bonding of the slab, the special 170x370 mm non-bounce plastic mallet must be used, tapping from the middle towards the edges so as to remove any air pockets between the back of the slab, the adhesive and the surface to be tiled.
- 7) Using the levelling system.

LEVELLING SYSTEM

The levelling system aims to guarantee perfectly levelled floors simply and quickly, eliminating any unevenness between the slabs. The levelling system is strongly recommended for laying **MAXFINE** slabs.

Instruments required

- Base clip;
- Wedge;
- Adjustable pliers for installing floors/wall tiles.

Application of the levelling system

Positioning the base clip:

- a) After spreading the adhesive, insert the base clip below the **MAXFINE** slab on the 4 sides.
- b) Depending on the format of the slab, position one or more supports for each side of the slab.
- c) Position the slab.

Inserting the wedge:

- a) Insert the wedge in the slot of the support, taking care not to exceed the breaking point.
- b) To make inserting the wedge easier, it is recommended to use the adjustable pliers.

Removing the support:

- a) Once the adhesive has dried, the protruding part of the support can be separated from the base clip by tapping with your foot in line with the joint.

GENERAL ADVICE FOR GROUTING

Pay attention while choosing joint sealants: check the technical sheets, choose them shade-matched and follow carefully the recommended cleaning times, as many new generation coloured sealants contain pigments and additives that can be very strong. For polished/glossy surfaces do not use epoxy grouts or synthetic based flexible mortars (Flexfughe) and do not add additives/latexes to the grout, as they make the removal of residues with standard detergents very difficult. However, should you decide to use them, it is recommended to make a previous test off site.

SOL, POSE TRADITIONNELLE

La pose des dalles **MAXFINE**, exige des conditions de pose analogue à celles demandées pour les dalles de format traditionnel. **MAXFINE**, exige la technique du double encollage: la colle doit être appliquée sur la sous-couche et au dos de la dalle.

Pour la pose au sol, **MAXFINE** exige les meilleures conditions de sous-couche :

- planéité
- dépoussiérage, suppression de débris et de grumeaux de béton
- la sous-couche doit être homogène et avoir déjà effectué le retrait hygrométrique de maturation
- réparation d'éventuelles fissurations
- les dénivelés de planéité doivent être comblés avec des produits de ragréage appropriés

Outils nécessaires

- ciment-colle en poudre à lit plein classe C2E selon les EN 12004 et S1 selon l'EN 12002
- spatule à dents carrées 3x3 mm et spatule à dents rondes 15 mm
- châssis à ventouse pour la manutention ou biventouse
- batteur en plastique anti-rebond 170x370 mm
- système de ragréage : base + coin + pince

Phases d'exécution

ENCOLLAGE AU SOL

- 1) Assurez-vous que la surface à revêtir est consistante, plane, dépoussiérée, sans graisse/huile.
- 2) Utilisez les colles décrites plus haut mélangées selon les spécifications indiquées sur la fiche technique du produit choisi.
- 3) Étalez la colle sur la surface à revêtir à l'aide d'une spatule à dents rondes 15 mm, en débordant de la dalle de 5/10 cm.
- 4) En tenant la dalle à la verticale sur le châssis de manutention, étalez la colle à l'aide de la spatule à dents carrées 3x3 mm au dos de la dalle.
- 5) À l'aide du châssis à ventouse, mettez la dalle à l'horizontale et posez-la.
- 6) Pour garantir l'encollage uniforme de la dalle, vous devrez utiliser un batteur spécial en plastique anti-rebond 170x370 mm et battre du centre vers les bords pour chasser les bulles d'air coincées entre le dos de la dalle, la colle et la sous-couche.
- 7) Utilisation du système de ragréage.

SYSTÈME DE RAGRÉAGE

Le système de ragréage est destiné à garantir, simplement et rapidement, des sols parfaitement mis de niveau en supprimant les dénivelés entre les dalles. Le système de ragréage est vivement conseillé pour la pose des dalles **MAXFINE**.

Outils nécessaires

- Base
- Coin
- Pince réglable pour pose au sol/ au mur

Application du système de ragréage

Positionnement de la base:

- a) Après avoir étalé la colle, insérez la base sous la dalle **MAXFINE** des 4 côtés.
- b) En fonction du format de la dalle, positionnez un ou plusieurs supports de chaque côté de celle-ci.
- c) Positionnez la dalle.

Insertion du coin:

- a) Insérez le coin dans la fente du support en faisant attention à ne pas dépasser le point de rupture.
- b) Pour faciliter l'insertion du coin, il est conseillé d'utiliser la pince de traction réglable.

Élimination du support:

- a) Dès que la colle est arrivée à maturation, séparez de la base la partie qui dépasse du support en battant du pied dans la direction de la ligne de fuite.

CONSEILS POUR LE JOINTOIEMENT

Faites attention dans le choix des mastics pour les joints ; vérifiez les fiches techniques, choisissez-les si possible ton sur ton et respectez scrupuleusement les temps de nettoyage conseillés dans la mesure où différents mastics colorés de nouvelle génération contiennent des pigments et d'additifs qui peuvent s'avérer particulièrement tenaces. Pour les surfaces polies, n'utilisez pas de mastics époxy ou de mortiers flexibles à base de matériaux synthétiques (Flexfughe) et n'ajoutez pas d'additifs/éléments lactiques au mastic, dans la mesure où ils rendent extrêmement difficile l'élimination des résidus avec les produits de nettoyage normaux. Si vous décidez de les utiliser malgré tout, nous vous recommandons de toujours effectuer un essai préalable en dehors de l'ouvrage.

TRADITIONNELLE BODENVERLEGUNG

Die Verlegung von **MAXFINE** - Platten erfordert ähnliche Bedingungen wie jene von Platten traditionellen Formats. **MAXFINE** erfordert die Anwendung der Technik des doppelten Auftragens; das heißt, der Klebstoff wird sowohl auf den Untergrund als auch auf die Unterseite der Platte aufgetragen. Für die Bodenverlegung erfordert **MAXFINE** die besten Untergrundbedingungen:

- Ebenheit;
- Keinerlei Staub, Schutt oder Zementklumpen;
- Die zu verlegende Fläche muss homogen sein und keine Restfeuchte verzeichnen;
- Reparatur eventueller Risse;
- Niveauunterschiede müssen mit entsprechenden Ausgleichsmitteln geebnet werden.

Notwendige Werkzeugausrüstung

- Klebstoff in Pulverform, auf Zementbasis im Vollbett der Klasse "C2E laut der Normen EN 12004 und S1 sowie der Norm EN 12002"
- Spachtel mit quadratischen Zacken, 3x3mm, und Spachtel mit runden Zacken, 15mm;
- Gestell mit Saugnäpfen oder Doppel-Saugnapfe
- Prallfester Kunststoffhammer, 170x370 mm;
- Planierungssystem: Grundlement + Keil + Zange.

Bearbeitungsphasen

AUFTRAGEN DES KLEBSTOFFS AUF DEM BODEN

- 1) Sicherstellen, dass die zu verlegende Bodenfläche robust, eben, staub- und fettfrei ist.
- 2) Die oben beschriebenen Klebstoffe gemäß der, auf dem Etikett des gewählten Klebstoffs angegebenen Zusammenstellung mischen und anwenden.
- 3) Den Klebstoff auf die zu verlegende Fläche mittels des Spachtels mit runden 15 mm-Zacken auftragen, auf eine Fläche, die 5/10 cm größer ist als die der Platte selbst.
- 4) Die Platte mit dem Gestell mit Saugnäpfen in senkrechte Position bringen und den Klebstoff, mittels des Spachtels mit quadratischen 3x3mm-Zacken, auf die Unterseite auftragen.
- 5) Mittels des Gestells mit Saugnäpfen die Platte in waagrechte Position bringen und verlegen.
- 6) Um das gleichmäßige Verlegen der Platte zu garantieren, muss der prallfeste Kunststoffhammer 170x370 mm verwendet werden, indem man von der Mitte der Platte aus in Richtung Ränder klopft, um eventuelle Luftblasen zwischen der Unterseite der Platte, dem Klebstoff und dem Boden zu beseitigen.
- 7) Das Planierungssystem anwenden.

PLANIERUNGSSYSTEM

Das Planierungssystem soll schnell und einfach perfekt geebnete Böden garantieren, indem es Niveauunterschiede ("Zacken") zwischen den Platten beseitigt. Das Planierungssystem wird für die Verlegung von **MAXFINE** - Platten wärmstens empfohlen. Notwendige Werkzeugausrüstung

- Grundlement;
- Keil;
- Verstellbare Zange für Installationen an Boden/Wandverkleidungen.

Anwendung des Planierungssystems

Positionierung des Grundlementes:

- a) Nachdem der Klebstoff aufgetragen wurde, das Grundlement über der Platte, entsprechend der 4 Seiten, anbringen.
- b) Je nach Format der Platte, ein oder mehrere Träger auf jeder Seite der Platte anbringen.
- c) Die Platte positionieren.

Anbringen des Keils:

- a) Den Keil am Schlitz des Trägers anbringen und dabei Acht geben, nicht über den Bruchpunkt hinaus zu gehen.
- b) Um das Anbringen des Keils zu erleichtern, empfiehlt sich der Gebrauch der, mit Zug verstellbaren Zange.

Entfernen des Trägers:

- a) Sobald der Klebstoff fest ist, wird der hervorstehende Teil des Trägers vom Grundlement getrennt, indem man mit dem Fuß in Richtung der Fugenlinie schlägt.

ALLGEMEINE HINWEISE FÜR DIE VERFUGUNG

Bei der Wahl der Fugendichtstoffe immer sehr vorsichtig sein. Prüfen Sie jeweils die Angaben in den technischen Merkblättern, und bevorzugen Sie Dichtstoffe im gleichen Farbton. Halten Sie sich strengstens an die für die Reinigung vorgegebenen Zeiten, da viele moderne farbige Dichtstoffe Pigmente und Zusatzstoffe enthalten, die besonders hartnäckig sein könnten. Benutzen Sie für die polierten/geschliffenen Oberflächen keine Epoxidstickmaterialien bzw. flexible Mörtel auf synthetischer Materialbasis (Flexfugen) und fügen Sie dem Stuck weder Zusatzstoffe noch Latex hinzu, da ansonsten eventuelle Rückstände nur sehr schwer mit herkömmlichen Reinigungsmitteln entfernt werden können. Sollte man diese Materialien jedoch trotzdem einsetzen, ist es empfehlenswert, zuerst einen Test an einer nicht sichtbaren Stelle durchzuführen.

CLEANING AND MAINTENANCE

PULIZIA E MANUTENZIONE

Premessa Tutti i materiali FMG sono di facile pulizia e di semplice manutenzione. Una pulizia adeguata ne valorizza le caratteristiche estetiche donando ad ogni pavimento un'eccezionale brillantezza.

Pulizia iniziale È di basilare importanza e deve essere effettuata immediatamente dopo la posa, per eliminare completamente i residui cementizi derivanti dalle malte, i residui di collanti e i residui epossidici che possono provenire dalle fughe. Viene consigliato l'uso di un prodotto acido, tipo DETERDEK a concentrazione 1:5. Strofinare energicamente e, dopo la pulizia, risciacquare abbondantemente con acqua pulita, per asportare tutte le tracce del detergente utilizzato. Queste operazioni sono indispensabili per tutte le collezioni FMG.

Manutenzione e cura Grazie al procedimento produttivo impiegato (alte temperature di cottura, materie prime di qualità e processo di sinterizzazione) la superficie dei materiali FMG è praticamente impermeabile (assorbimento d'acqua minimo). Pertanto anche la sporcizia non può penetrare ma deve soltanto essere asportata dalla superficie del materiale. In questa operazione si sconsiglia di utilizzare detergenti contenenti cere o prodotti ceranti onde evitare la formazione di strati untuosi; per la scelta del detergente più appropriato, fare riferimento ai capitoli seguenti.

Consigli generali Per grandi superfici soggette a carichi di sporco notevoli, quali aeroporti, ospedali, supermercati e luoghi pubblici ad alta intensità di traffico, si rendono indispensabili macchine per la pulizia con aspirazione dei liquidi di lavaggio. Ciò permetterà di ottenere non solo una pulizia profonda ma anche l'asportazione dei liquidi contenenti la sporcizia: in tal modo viene evitata la formazione di patine o pellicole altrimenti molto difficili da asportare. Al fine di preservare le superfici dallo sporco e dalle lavorazioni di cantiere, a posa terminata le pavimentazioni, in particolar modo quelle realizzate con materiali levigati, devono essere adeguatamente protette con truciolare o altri materiali idonei. In tal modo sarà possibile evitare danneggiamenti provocati da lavorazioni successive.

Sui materiali FMG possono essere utilizzati tutti i detergenti esistenti sul mercato alla concentrazione indicata; è escluso l'acido fluoridrico (HF) e tutti i suoi composti, come da norma UNI-EN 176. La concentrazione del detergente deve essere sempre la più bassa possibile, sia per contenere i costi che per velocizzare la manutenzione. Per pavimenti sopraelevati si consigliano prodotti lucidati o levigati in formati grandi in modo da effettuare operazioni di manutenzione a secco, o con un minimo utilizzo di liquidi. Una volta ultimata la posa in opera è necessario effettuare una pulizia iniziale approfondita della pavimentazione con prodotti idonei.

Materiali naturali Per questi materiali, dopo aver effettuato le operazioni specificate nella sezione "Pulizia iniziale" è sufficiente una normale manutenzione con una soluzione acquosa contenente piccole percentuali di un detergente alcalino, tipo FILA CLEANER alla concentrazione 1:200. Per questi tipi di superficie è sconsigliabile eseguire un trattamento impermeabilizzante: non essendoci alcuna porosità, l'impermeabilizzazione si depositerebbe soltanto sulla superficie in modo disomogeneo causando così effetti estetici disarmonici.

CLEANING AND MAINTENANCE

Introduction All FMG materials are easy to clean and maintain. Regular cleaning highlights the aesthetic features of the material and gives the floor an exceptional shine.

Initial cleaning The initial cleaning done immediately after the flooring laid is of essential importance for removing all mortar, adhesives and epoxy residues that may be left in the joints. In this initial phase, we recommend that you use an acid product such as DETERDEK, in a 1:5 concentration. Rub energetically to obtain the maximum cleaning. After washing the floor, which is just as important, rinse thoroughly with plenty of water to remove all traces of the detergent used. These steps are recommended for all FMG collections.

Maintenance and care Thanks to the characteristics of the production process (high firing temperature, raw materials of great quality, sinterizing process), the surface of FMG material is waterproof (the water absorption is minimum). Therefore the dirt cannot penetrate but it is necessary to remove it from the surface. For this procedure do not use detergents containing waxes or waxing products, in order to avoid the forming of greasy layers; for choosing the most appropriate detergent refer to the following chapters. After the installation of floors, particularly of those made with polished materials, the surfaces should be adequately protected with particle board or other suitable materials in order to protect them from dirt and on-site processing. This prevents damage caused by subsequent processing

General recommendations For commercial and heavily used surface areas such as airports, hospitals, supermarkets, and any public spaces with heavy foottraffic which are thus subject to considerable soiling, it is necessary to use automatic cleaning machines with suction of the washing liquids. This allows not only deep cleaning, but also the continuous removal of liquids containing substances that cause soiling, thus preventing the formation of films which are very difficult to remove. Any detergent on the market can be used in the desired concentration for cleaning the high technology sinterized FMG products, with the exception of HYDROFLUORIC acid (HF) or its compounds, according to UNI-EN 176 standards. In order to keep costs limited and speed up maintenance operations, the concentration of the detergent must always be as low as possible. For raised floors we suggest to choose bright or polished surfaces in large sizes: these materials can be dry cleaned or with the minimum use of liquids. After the floor is laid it is necessary to make a very accurate initial cleaning with proper products.

Matt materials For these materials, after completing the steps described in the section "Initial Cleaning", you only need to clean the floor with hot water containing small quantities of an alkaline detergent such as FILA CLEANER in a concentration 1:200. On these types of surface it is not advisable to apply a waterproofing product: the absence of porosity causes the waterproofing agent to deposit on the surface in an uneven way and to have unpleasant aesthetic effects.

EINIGUNG UND PFLEGE

Einleitung_Alle FMG Materialien sind einfach zu reinigen und pflegeleicht. Eine angemessene Reinigung wertet die ästhetischen Eigenschaften auf und verleiht jedem Boden einen außergewöhnlichen Glanz.

Erste Reinigung_Von entscheidender Bedeutung ist die Anfangsreinigung, die direkt nach dem Verlegen zu erfolgen hat, um aus dem Mörtel stammende Zementrückstände, Kleberrückstände sowie Epoxydrückstände der Fugen vollständig zu beseitigen. In dieser Phase wird die Verwendung eines säurehaltigen Produktes empfohlen zum Beispiel DETERDEK in einer Konzentration von 1:5. Für eine gründliche Reinigung muß kräftig geschauert werden. Nach der Reinigung

ist das Spülen mit reichlich Wasser ebenfalls von großer Wichtigkeit, um alle Spuren des verwendeten Reinigungsmittels zu entfernen. Diese Arbeitsgänge sind für alle Kollektionen unverzichtbar.

Wartung und pflege_Dank des angewandten Prouktionsverfahrens (hohe Brenn-temperatur, qualitativ hochwertiges Rohmaterial und Sinterung) ist die Oberfläche der FMG Materialien praktisch völlig wasserabweisend (minimale Feuchtigkeitsaufnahme). Daher kann Schmutz auch nicht in die Oberfläche eindringen, sondern muß nur von der Oberfläche entfernt werden. Es ist davon abzuraten, dafür wachshaltige Reinigungsmittel oder Produkte zum Einwachsen zu verwenden, um die Bildung von öligen Schichten zu vermeiden.

In den nachfolgenden Abschnitten wird näher auf die Auswahl der geeigneten Reinigungsmittels eingegangen. Um die Oberflächen vor Verschmutzungen und Beschädigungen durch Bauarbeiten zu schützen, müssen die Bodenbeläge, insbesondere die aus geschliffenen Materialien, nach der Verlegung entsprechend mit Spanplatten oder anderen geeigneten Materialien abgedeckt werden. Auf diese Weise können Beschädigungen durch spätere Arbeiten vermieden werden.

Allgemeine Hinweise_Für grosse, bedeutende Oberflächen wie Flughäfen, Krankenhäuser, Supermärkte und andere öffentliche Bereiche mit hohem Verkehrsaufkommen, die daher auch einer starken Verschmutzung ausgesetzt sind, ist der Einsatz von automatischen Reinigungsmaschinen mit Absaugung der Reinigungsflüssigkeit unverzichtbar, da sie nicht nur eine tiefe Reinigung erlauben, sondern auch ständig die Flüssigkeit mit dem Schmutz entfernen und so die Bildung von eventuellen Schmutz-oder Schmierfilmen vermeiden, die immer schwer zu entfernen sind.

Auf den FMG Materialien, können alle auf dem Markt befindlichen Reinigungsmittel in der gewünschten Konzentration verwendet werden, mit Ausnahme von Fluorsäure (HF) oder ähnlichen Produkten, gemäss UNI-EN 176.

Die Konzentration des Reinigungsmittels muss aus Gründen der Kosten und der Schnelligkeit der Reinigung stets so gering wie möglich sein. Für die Doppelböden werden grossen Formate in glänzender oder geschliffener Ausführung empfohlen, so, dass eine trockene oder leicht feuchte Pflege ausreichend ist. Nach Abschluss der Verlegearbeit ist es notwendig, mit geeigneten Reinigungsmitteln eine gründliche Anfangsreinigung des Fussbodens durchzuführen.

Matt Materialien_Für diese Materialien ist, nachdem die im Kapitel "Anfangsreinigung" dargelegten Schritte durchgeführt wurden, eine gewöhnliche Wartung mit einer wässrigen Lösung, die einen kleinen Anteil alkalischen Reinigungsmittels (zum Beispiel FILA CLEANER in der Konzentration 1:200) enthält, notwendig. Für diese Arten von Oberfläche ist von einer Wasserfestigkeitsbehandlung abzuraten; da die Oberflächen nicht porös sind, würde eine Wasserfestigkeitsbehandlung nur zu ungleichmässigen Ablagerungen auf der Oberfläche und damit zu einem optisch disharmonischen Eindruck führen.

NETTOYAGE ET ENTRETIEN

Avant-propos_Tous les matériaux FMG sont faciles à nettoyer et à entretenir. Un nettoyage adéquat met en relief les caractéristiques esthétiques, conférant à chaque sol un éclat particulier.

Nettoyage initial_Le nettoyage initial est d'une importance fondamentale et doit s'effectuer immédiatement après la pose pour éliminer totalement les résidus de ciment des mortiers, les résidus de colle et les résidus epoxy provenant des joints. Nous conseillons dans cette phase d'utiliser un produit acide, du type DETERDEK concentré à 1:5. Frottez énergiquement pour obtenir un nettoyage parfait.

Après le lavage, il est également important de rincer abondamment à l'eau claire pour éliminer toutes les traces du détergent utilisé. Ces opérations sont indispensables pour toutes les collections de FMG.

Entretien et soin_Grâce aux caractéristiques du procédé de production (hautes températures de cuisson, matières premières de qualité et procédé de grésage) la surface des matériaux FMG est pratiquement imperméable (l'absorption d'eau est minimum). Cela signifie que la saleté ne peut pas pénétrer mais doit seulement être retyrée de la surface du matériau. Pour cette opération on déconseille l'usage des détergents contenant de la cire ou des produits de cirage afin d'éviter la formation de couches de graisse ; pour le choix du détergent le plus approprié, lisez les chapitres suivants. Après avoir achevé la pose des sols, notamment ceux réalisés avec des matériaux polis, appliquer des panneaux de particules ou autres matériaux adéquats pour protéger comme il se doit les surfaces contre la saleté et les résidus de chantier. Il sera ainsi possible d'éviter que les opérations suivantes n'abîment le carrelage.

Conseils généraux_Pour les grandes et importantes surfaces comme les aéroports, les hopitaux, les supermarchés et les lieux publics à circulation très intense et qui par conséquent se salissent beaucoup, il est indispensable d'utiliser des machines automatiques de nettoyage qui aspirent les liquide de lavage. Vous obtiendrez non seulement un nettoyage profond mais vous éliminerez en permanence les liquides contentant les matériaux responsable de saleté et vous éviterez la formation de patine ou de pelicule qui sont toujours très difficiles à éliminer. Vous pouvez utiliser sur les matériaux FMG, produits de haute technologie et grésage, tous les détergents que propose le marché, à la concentration souhaitée, excepté l'acide fluorhydrique (HF) et ses composants, suivant les normes UNIEN 176. La concentration du détergent doit toujours être la plus faible possible pour réduire le coût et activer l'entretien. Pour les faux-planchers nous conseillons, dans les grands formats, les produits lustrés ou polis. En effet, nous recommandons un entretien à sec, ou avec un minimum de liquide. Quand la pose est terminée, il est nécessaire d'effectuer un nettoyage initial très approfondi avec les produits appropriés.

Materiaux non polis_Après avoir effectué les opérations décrites plus haut, un entretien normal suffit à ces matériaux, avec une solution aqueuse contenant un fibre pourcentage de détergent alcalin, type FILA CLEANER à des concentration de 1:200 pour ces types de surface ni est pas conseillable de faire un traitement imperméabilisant : vu qu'ils ne sont pas poreuses l'argent imperméabilisant resterait sur la surface et causerait des effets esthétiques non harmonieux.

	CASSA CON INTERFALDA 150x150: Ingombro: 172 x 163 x h.41 cm Peso: 68 kg <i>Crate with padding layers 150x150: Size: 172 x 163 x 41(H) cm Weight: 68 kg</i>	150x150	24	-	54,00	827,80	- ordine minimo 4 lastre per cassa; - in ciascuna cassa il numero di lastre per articolo deve sempre essere pari; - non sono ammessi più di 6 articoli (codici) differenti per cassa; carico su camion: - sovrapponibilità max. su camion n. 5 casse; - max. 28 casse su camion (7 spazi) compatibilmente con i limiti di peso totale; - possibilità di affiancare a ciascuna pila nr. 1 europallet; - <i>minimum order: 4 slabs per crate; each crate must always contain an even number of slabs per item; no more than 6 items (codes) per crate allowed;</i> loading on lorry: - <i>stack max. 5 crates on lorry; max. 28 crates on lorry (7 spaces) within total weight limits; option of placing 1 euro-pallet next to each stack;</i>

NOTE

- Il peso di casse e cavalletti è suscettibile di variazioni sensibili in base allo stato di umidità al momento della misurazione del peso;
- carico su camion: l'indicazione del numero massimo di casse è riferito ad un pianale unico di 13,6 x 2,45 m, compatibilmente con il peso; per camion di dimensioni differenti occorre riformulare il calcolo sulla base dello spazio e del volume delle casse;
- Carico su camion: per la sovrapponibilità di casse alte e basse non oltrepassare l'altezza max. del numero di casse alte indicate per ciascun formato;
- Imballo in casse alte / basse / pallet: a parità di articolo (codice) ordinato, le casse vengono via via riempite secondo l'imballo di massima capienza (es: ordine 90 mq articolo XYZ in formato 150x75 cm sarà imballato con nr. 1 cassa alta contenente 58,5 mq + nr. 1 cassa alta per 31, 5 mq);
- Reso delle casse: Il cliente avrà la facoltà di restituire le casse addebitate in fattura, franco stabilimento Ariostea. Personale autorizzato accerterà lo stato delle casse rese e compilerà il modulo di reso esclusivamente per le casse integre e complete dei quattro dischi metallici (bulldog) posti su ciascun angolo. Non possono essere resi né cavalletti, né pallet.

NOTE

- The weight of the crates and racks is subject to significant variations based on the moisture content at the time the weight was measured;
- Loading on lorry: the specified maximum number of crates refers to a single 13.6 x 2.45 m platform, within weight limits; for lorries of different sizes, calculation must be made based on the space and volume of the crates;
- Loading on lorry: to stack tall and short crates, do not exceed the maximum height for the number of tall crates specified for each format;
- Packaging in pallets/tall/short crates: for the same item (code) ordered, the crates are gradually filled according to the package of maximum capacity (e.g.: an order of 90 sq.m. of item XYZ in format 150 x 75 cm will be packaged in 1 tall crate containing 58.5 sq.m. + 1 tall crate containing 31.5 sq.m.);
- Crate return: the customer will have the option of returning the crates billed on the invoice, ex-factory Ariostea. Authorised employees will check the conditions of the returned crates and will fill out the return form, exclusively for undamaged crates that include the four toothed metal discs placed on each corner. Racks and pallets cannot be returned.

	CAVALLETTO DA 48 LASTRE: Ingombro: 161 x 74 x h.191 cm Peso: 85 kg <i>Rack for 48 slabs: Size: 161 x 74 x 191(H) cm Weight: 85 kg</i>	150x150 cavalletto 48 lastre rack 48 slabs	48	-	108,00	1.604,60	- un cavalletto può contenere max. 5 articoli (codici) differenti; - il cavalletto deve essere riempito per la massima capacità indicata; <i>- one rack may contain up 5 different items (codes); - the rack must be filled to the maximum capacity specified;</i>

CONTAINER 40 PIEDI (11,90 x 2,33 x h.2,35 m)*
- nr. 18 casse 300x150; - nr. 30 casse 300x100 + nr. 5 casse 150x150; - nr. 30 casse 300x100 + nr. 6 casse alte 75x37,5\75x75\150x75; - nr. 30 casse 300x100 + nr. 6 casse alte 100x100; - nr. 30 casse 300x100 + nr.10 casse alte 150x100; - nr. 24 casse 120x120 (compatibilmente con il peso); - nr. 35 casse 150x150 (compatibilmente con il peso); *Per quanto riguarda i formati 120x120, 100x100 o 75x37,5\75x75\150x75 il calcolo deve tenere conto del peso (non si occupa mai tutto lo spazio a disposizione poichè si eccederebbero i limiti di peso).
40 FOOT CONTAINER (11.90 x 2.33 x 2.35(H) m)*
- 18 crates 300x150; - 30 crates 300x100 + 5 crates 150x150; - 30 crates 300x100 + 6 tall crates 75x37.5\75x75\150x75; - 30 crates 300x100 + 6 tall crates 100x100; - 30 crates 300x100 + 10 tall crates 150x100; - 24 tall crates 120x120 (within weight limits); - 35 tall crates 150x150 (within weight limits); *concerning the 120x120, 100x100 or 75x37.5\75x75\150x75 formats, calculation must take weight into account (the space is never completely filled as weight would be exceeded).

CONTAINER 20 PIEDI (5,90 x 2,32 x h. 2,35 m)
- nr. 6 casse 300x150; - nr. 10 casse 300x100 + nr. 5 casse 150x150; - nr. 10 casse 300x100 + nr. 10 casse alte150x100; - nr. 10 casse 300x100 + nr. 6 casse alte 75x37,5\75x75\150x75; - nr. 10 casse 300x100 + nr.12 casse alte100x100; - nr. 15 casse 150x150 + nr. 3 casse alte 75x37,5\75x75\150x75; - nr. 12 casse alte 120x120 (compatibilmente con il peso); - nr. 27 casse alte100x100 (compatibilmente con il peso); - nr.18 casse alte 75x37,5\75x75\150x75; - nr.18 casse alte150x100.
20 FOOT CONTAINER (5.90 x 2.32 x 2.35(H) m)
- 6 crates 300x150; - 10 crates 300x100 + 5 crates 150x150; - 10 crates 300x100 + 10 tall crates 150x100; - 10 crates 300x100 + 6 tall crates 75x37.5\75x75\150x75; - 10 crates 300x100 + 12 tall crates 100x100; - 15 crates 150x150 + 3 tall crates 75x37.5\75x75\150x75; - 12 tall crates 120x120 (within weight limits); - 27 tall crates 100x100 (within weight limits); - 18 tall crates 75x37.5\75x75\150x75; - 18 tall crates 150x100.

NOTE
Per la **sovrapponibilità di casse alte e basse** della medesima dimensione occorre rispettare il limite di altezza massima della pila pari a 2,10 m, tenendo presente che il carrello elevatore per il carico dei container non può sollevarsi oltre 1,40 m all'interno del container stesso.

NOTE
Concerning the **stackability of tall and short crates** of the same size, the maximum stack height of 2.10 m, should be respected, bearing in mind that the lift truck for loading the container cannot lift above 1.40 m inside the container itself.

CONDIZIONI
Confezionamento su cavalletto: applicare sconto pallettizzato e relativo costo cavalletto

CONDITIONS
Packaging on rack: apply palletised discount and relative rack cost

NOTE GENERALI

- Il peso di casse e cavalletti è suscettibile di variazioni sensibili in base allo stato di umidità al momento della misurazione del peso.
 - Carico su camion: l'indicazione del numero massimo di casse è riferito ad un pianale unico di 13,6x2,45m, compatibilmente con il peso; per camion di dimensioni differenti occorre riformulare il calcolo sulla base dello spazio e del volume delle casse.
- SapienStone si riserva la facoltà di apportare eventuali modifiche alle informazioni su pesi, dimensioni e imballi contenute nel presente documento.

GENERAL NOTES

- The weight of the crates and racks is subject to significant variations based on the moisture content at the time the weight was measured.
 - Loading on lorry: the specified SapienStone number of crates refers to a single 13.6x2.45 m platform, within weight limits; for lorries of different sizes, calculation must be made based on the space and volume of the crates.
- SapienStone reserves the right to make any changes to information on weight, size and packaging contained in this document.

Anticipando i tempi, investiamo con coraggio per costruire un futuro più sostenibile, come per il primo impianto ceramico nel mondo alimentato a idrogeno. Nelle nostre fabbriche a emissioni zero nascono materiali unici, che si distinguono per innovazione, sostenibilità ed estetica. Superfici pensate per essere al servizio dell'uomo, fabbricate nel massimo rispetto dell'ambiente e delle persone: sicure, igieniche, durature, confortevoli.

VENATURA DELLE LASTRE E APPRONTAMENTO ORDINI
Per garantire la migliore resa estetica, le lastre Maxfine presentano un certo numero di facce differenti.
Nell'approntamento degli ordinativi, la selezione delle lastre rispetta la casualità tipica dei materiali naturali: non è perciò possibile garantire la continuità nel disegno della venatura tra i vari pezzi spediti. Maxfine nasce dalla combinazione della terra con il fuoco: l'eventuale continuità della venatura tra lastre diverse soggiace alla tipica tolleranza dei prodotti naturali.

Nominal sizes

TUTTI I FORMATI SONO NOMINALI.
FMG Fabbrica Marmi e Graniti si riserva la facoltà di modificare in qualunque momento le informazioni e le caratteristiche illustrate in questo catalogo, che non sono comunque da ritenere legalmente vincolanti. I colori e le caratteristiche estetiche dei prodotti sono quanto più possibile vicini a quelli reali, nei limiti consentiti dai processi di stampa.

Chromatic variations

La trasformazione di materie prime naturali, associata all'utilizzo di innovative tecnologie di produzione brevettate, consente di ottenere materiali dalle elevate prestazioni tecniche, che si distinguono per i tipici effetti a tutto spessore da sempre prerogativa esclusiva dei marmi e delle pietre di cava.
Le variazioni cromatiche, di venatura e le piccole puntinature sono pertanto caratteristiche di alto pregio dei materiali FMG, ricercate e volute proprio al fine di ricreare la suggestione di una pavimentazione esclusiva, in cui si possa riscoprire la casualità e la bellezza dei materiali naturali. In ragione di quanto sopra i riferimenti cromatici presentati su cataloghi e campionature sono da intendersi puramente indicativi.

FMG Fabbrica Marmi e Graniti riserva il diritto di apportare, qualora lo ritenesse opportuno, eventuali modifiche tecniche e formali ai dati riportati in questo catalogo. Le immagini riprodotte sono quanto più possibile vicine alla realtà. La riproduzione di colori è approssimativa. Tutti i diritti sono riservati. Ogni riproduzione totale o parziale dei contenuti del presente catalogo, sia di testo che di immagine, è vietata e sarà perseguita in termini di legge.

SLAB VEINS AND ORDER PREPARATION
To ensure optimal aesthetic performance, Maxfine slabs have a certain number of different faces.
During order preparation, slabs are randomly selected to reproduce the random nature of natural materials: this means we cannot guarantee continuity of the veins between the various different pieces shipped. Maxfine is produced by the combination of earth and fire: continuity of veins between slabs is subject to the tolerance typical of natural materials.

ALL SIZES ARE NOMINAL.
FMG Fabbrica Marmi e Graniti reserves the right to modify the information and the characteristics illustrated in this catalogue (which are in any case not legally binding) at any moment.
The colours and appearance features of the products are as close as possible to reality, within the limitation of the printing process.

The processing of natural raw materials, combined with the use of leading-edge patented production techniques, makes it possible to obtain high-tech materials characterized by typical full-body effects, a feature that has always been the exclusive hallmark of quarried marble and stone.
Chromatic variations, veining and speckling are thus prized characteristics of FMG materials, designed and produced to recreate the fascination of exclusive floorings, that reveal the randomness and beauty of natural materials. On the basis of the above statements, the colour references in the catalogues and samples are to be considered as approximate.

FMG Fabbrica Marmi e Graniti reserves the right to make any technical and size-related modifications to the data specified in this catalogue should it deem it necessary. The pictures shown are as close to reality as possible. Colour reproduction is approximate. All rights reserved. Any reproduction, whether total or partial, of the contents of this catalogue - whether text or image - is forbidden and will be prosecuted by law.

VEINES DES DALLES ET PREPARATION COMMANDES
Pour garantir le meilleur rendement esthétique, les dalles Maxfine présentent un certain nombre de faces différentes.
Lors de la préparation des commandes, la sélection des dalles respecte le caractère aléatoire typique des matériaux naturels: par conséquent, il n'est pas possible de garantir la continuité du dessin des veines entre les différentes pièces expédiées. Maxfine naît de la combinaison de la terre avec le feu: l'éventuelle continuité des veines entre différentes dalles correspond à la tolérance typique des produits naturels.

TOUS LES FORMATS SONT NOMINAUX.
FMG Fabbrica Marmi e Graniti se réserve la faculté de modifier à tout moments les informations et les caractéristiques figurant dans le présent catalogue, lesquelles n'engagent pas par le fabricant au plan légal. Les couleurs et les caractéristiques esthétiques sont fidèles aux couleurs et caractéristiques réelles dans les limites des procédés d'impression.

La transformation de matières premières naturelles, allée à l'application de technologies de production d'avant-garde brevetées, permet d'obtenir des matériaux capables de performances techniques élevées se distinguant par leurs effets pleine masse typiques qui sont depuis toujours la prérogative exclusive des marbres et des pierres de carrière.
Les variations chromatiques, les veines et les petits points sont donc des caractéristiques de grande valeur des matériaux FMG, recherchées et voulues dans le but de recréer la suggestion d'un sol exclusif grâce auquel il est possible de redécouvrir l'impondérable et la splendeur des matériaux naturels. C'est la raison pour laquelle les références chromatiques présentées sur les catalogues et les échantillons ne sont données qu'à titre indicatif.

FMG Fabbrica Marmi e Graniti se réserve le droit d'apporter, si nécessaire, des modifications techniques et formelles aux données reportées sur ce catalogue. Les images reproduites sont le plus possible proches de la réalité. La reproduction des coloris est indicative. Tous les droits sont réservés. Toute reproduction totale ou partielle des contenus du présent catalogue, textes et images, est interdite et sera poursuivie en termes de droit.

PLATTENMASERUG UND AUFTRAGSVORBEREITUNG
Für die beste Ästhetik bei der Anwendung weisen die Platten Maxfine eine gewisse Anzahl unterschiedlicher Oberseiten auf. Bei der Vorbereitung der Aufträge entspricht die Auswahl der Platten dem typischen Zufallsprinzip der natürlichen Materie: es kann von daher keine Kontinuität bei der Maserung unter den verschiedenen versandten Stücken garantiert werden. Maxfine entsteht aus der Kombination von Erde und Feuer: eine ggf. vorhandene Kontinuität der Maserung auf den Platten unterliegt der typischen Toleranz der Naturprodukte.

ALLE FORMATE SIND NENNWERTE.
Die Firma FMG Fabbrica Marmi e Graniti behält sich vor, die in diesem Katalog enthaltenen Informationen und Eigenschaften jederzeit zu ändern; sie gelten auf keinen Fall als gesetzlich bindend. Die Farben und ästhetischen Eigenschaften der Produkte kommen innerhalb der Möglichkeiten der Druckverfahren den tatsächlichen Eigenschaften so weit wie möglich nahe.

Die Umwandlung von natürlichen Rohmaterialien mit Hilfe von innovativen und patentierten Produktionstechnologien, ermöglicht die Herstellung von Materialien mit hoher technischer Leistungsfähigkeit, die sich durch die typischen vollgemischten Effekte unterscheiden und die seit jeher die charakteristische Besonderheit der Marmorsorten und der Steine aus dem Steinbruch sind.
Die farblichen Unterschiede, die Äderungen und die kleinen Punkte sind aus diesem Grund charakteristische Eigenschaften der Materialien FMG von besonderem Wert. Diese "Unvollkommenheiten" sind besonders gewählt und gewollt, um einen exklusiven Bodenbelag zu erzielen, bei dem die Zufälligkeit und die Schönheit der natürlichen Materialien voll zum Ausdruck kommen können. Angesichts der oben aufgeführten Tatsache sind die Farben der Kataloge und der Muster unverbindlich.

Die Firma FMG Fabbrica Marmi e Graniti behält sich vor, die in diesem Katalog enthaltenen Informationen und Eigenschaften jederzeit zu ändern. Die Bilder der Produkte kommen innerhalb der Möglichkeiten der Druckverfahren den tatsächlichen Eigenschaften so weit wie möglich nahe. Die Farbwiedergabe ist ungefähr. Alle Rechte vorbehalten.
